

## Topterra Casing Types (with fields of use and packing possibilities)

All of our casings are ready for use, you just have to pre-wet them.

### **EXPORT**

---

**To be used for: Hand Pick (Export)**

**Packed in: 50 lt. Bags, Big Bags 25, 50 & Bulk**

Quality peat's mixed with sugarbeet-lime make a casing with a moisture content of about 78-80 % which can be handled easily, however this casing needs more on-farm preparation before use.

### **EUROPE**

---

**To be used for: Hand Pick (Export)**

**Packed in: 50 lt. Bags, Big Bags 25, 50 & Bulk**

A coarse, wet casing with sugarbeet-lime. It has a moisture content of about 78 - 80 %. The casing can be moistened up easily and will maintain its structure, softness and moisture easier in the later flushes.

### **HORST**

---

**To be used for: Hand Pick (Export)**

**Packed in: 50 lt. Bags, Big Bags 25, 50 & Bulk**

In this casing we add stone grindings instead of sugarbeet-lime to adjust the pH. The casing has a moisture content of about 78 – 80 %. Because of the use of stone grindings it has a more open structure, but still has good water management properties all through the flushes.

### **TT10**

---

**To be used for: Hand Pick (Export)**

**Packed in: Big Bag 25, 50 & Bulk**

A coarse, wet casing with sugarbeet-lime. It has a moisture content of about 78- 80 %. The casing can be moistened up easily and will maintain its structure, softness and moisture easy in the later flushes.
