

NEWS

Summer 2010

In this issue:

- New: Extra **ECO-PRO™**-Coating for 3% - 5% extra yield.
- New production-unit extended
- Product-range extended with NON-GMO and ECO-formula
- Also available in the USA & Australia

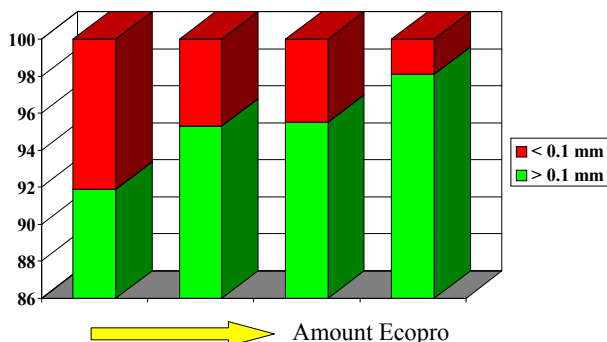

New: Extra ECO-PRO Coating for 3% - 5% extra yield

In order to improve the quality of our **MCSubstradd®**-supplements furthermore, **HAVENS–research** developed a new extra product-coating: **ECO-PRO™**

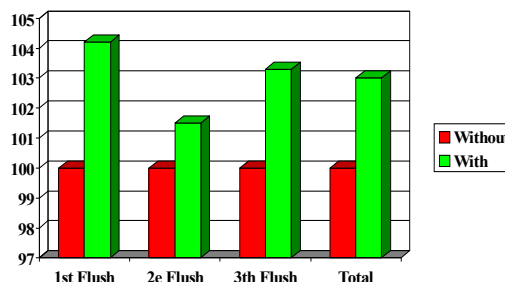

ECO-PRO™ is an **organic, 100% natural, slow-release agent**, that fortifies the slow-release action of all MCSubstradd-supplements. It can also be used as principal agent in **100% organic** or in **NON-GMO formulas**.

ECO-PRO™ has been developed thanks to EC-innovation-subsidies and has been tested during several field-trials. As an extra advantage, **ECO-PRO™**-coated supplements contain less small particules (*“less dusty”*), offer a better distribution and, most import, give an extra yield-increase (+ 3% to + 5%).

The new conditioner was installed in 2009 ►

New production facility completed

After installing our **new conditioning-unit** in 2009 (►), **MCSubstradd®** now has expanded the line with **new riping and conditioning-silos**. In the same time, our overall capacity has improved significantly.

“More and more, our customers demand innovative products with the best slow-release effect. We are convinced this in another step in optimising the extra + 30%-yield we target”, says Wim Joosten, international sales-representative.

For more information, please contact our sales-staff.

New **MCSubstradd®** investments in 2010 ►

Product-range extended

With the extra organic ECO-PRO-treatment, **MCSubstradd®** has extended the product-line. Customers can basically choose out of 4 lines (Classic-line, Organic-line, NON-GMO-protein and High-Protein-line). All formulas are guaranteed contamination-free

Custom-made supplements e.g. for customers looking for special Phase 2 or Phase 3 compositions, are also possible. Please contact our **MCSubstradd®** sales-staff.

Available in USA & Australia

Please note that **MCSubstradd®** is world-wide available, including North and South America and Australia. For product- and price-inquiries please contact:
